Understanding the Power of Intentional Teaching Cards

Think of intentional teaching cards as minilessons plans cleverly condensed onto a single card They offer a concise overview of Learning Objective What specific skill or concept will the children learn eg identifying colors counting to ten understanding shapes Materials What resources are needed eg blocks paint playdough picture cards Activity A clear and concise description of the activity itself eg Build a tower using ten blocks counting each one aloud Assessment How will you gauge the childrens understanding eg observation questioning creating a simple drawing Differentiation How can you adapt the activity for children with varying skill levels eg providing extra support for struggling learners offering challenges for advanced learners Visual Imagine a card divided into sections each clearly labelled with the above points Include a mockup of a card maybe a simple drawing of a child building a

tower with the written points clearly visible

2 How to Create Your Own Intentional Teaching Cards

1 Choose a Theme Start by selecting a broad theme relevant to your curriculum such as Colors Animals Shapes or Numbers This helps maintain coherence and flow in your teaching

2 Identify Learning Objectives For each theme break down the specific learning objectives you want to achieve Keep them ageappropriate and measurable For example instead of Learn about animals a better objective would be Identify three common farm animals and describe their sounds

3 Design Your Cards Use index cards sturdy cardstock or even create digital cards using Canva or PowerPoint Ensure the font is large and clear with vibrant visuals to attract young children Consider using bright colors and relevant pictures or illustrations

4 Write Concise Instructions Keep the activity descriptions simple and easy to follow Use action verbs and childfriendly language Avoid jargon or overly complex sentences

5 Plan for Differentiation Think about how you can adapt each activity to meet the diverse needs of your learners This might involve providing extra support modified materials or more challenging extensions

6 Add Assessment Strategies How will you know if the children have met the learning objective Include simple assessment methods like observation questioning or creating a simple product

Visual Include images of different types of cards simple handwritten cards more visually elaborate ones with pictures and potentially a screenshot of a digital cardmaking tool
